

# The Historical Room Project

*Embracing Goodnow's Rich History, While Providing for the Future.*

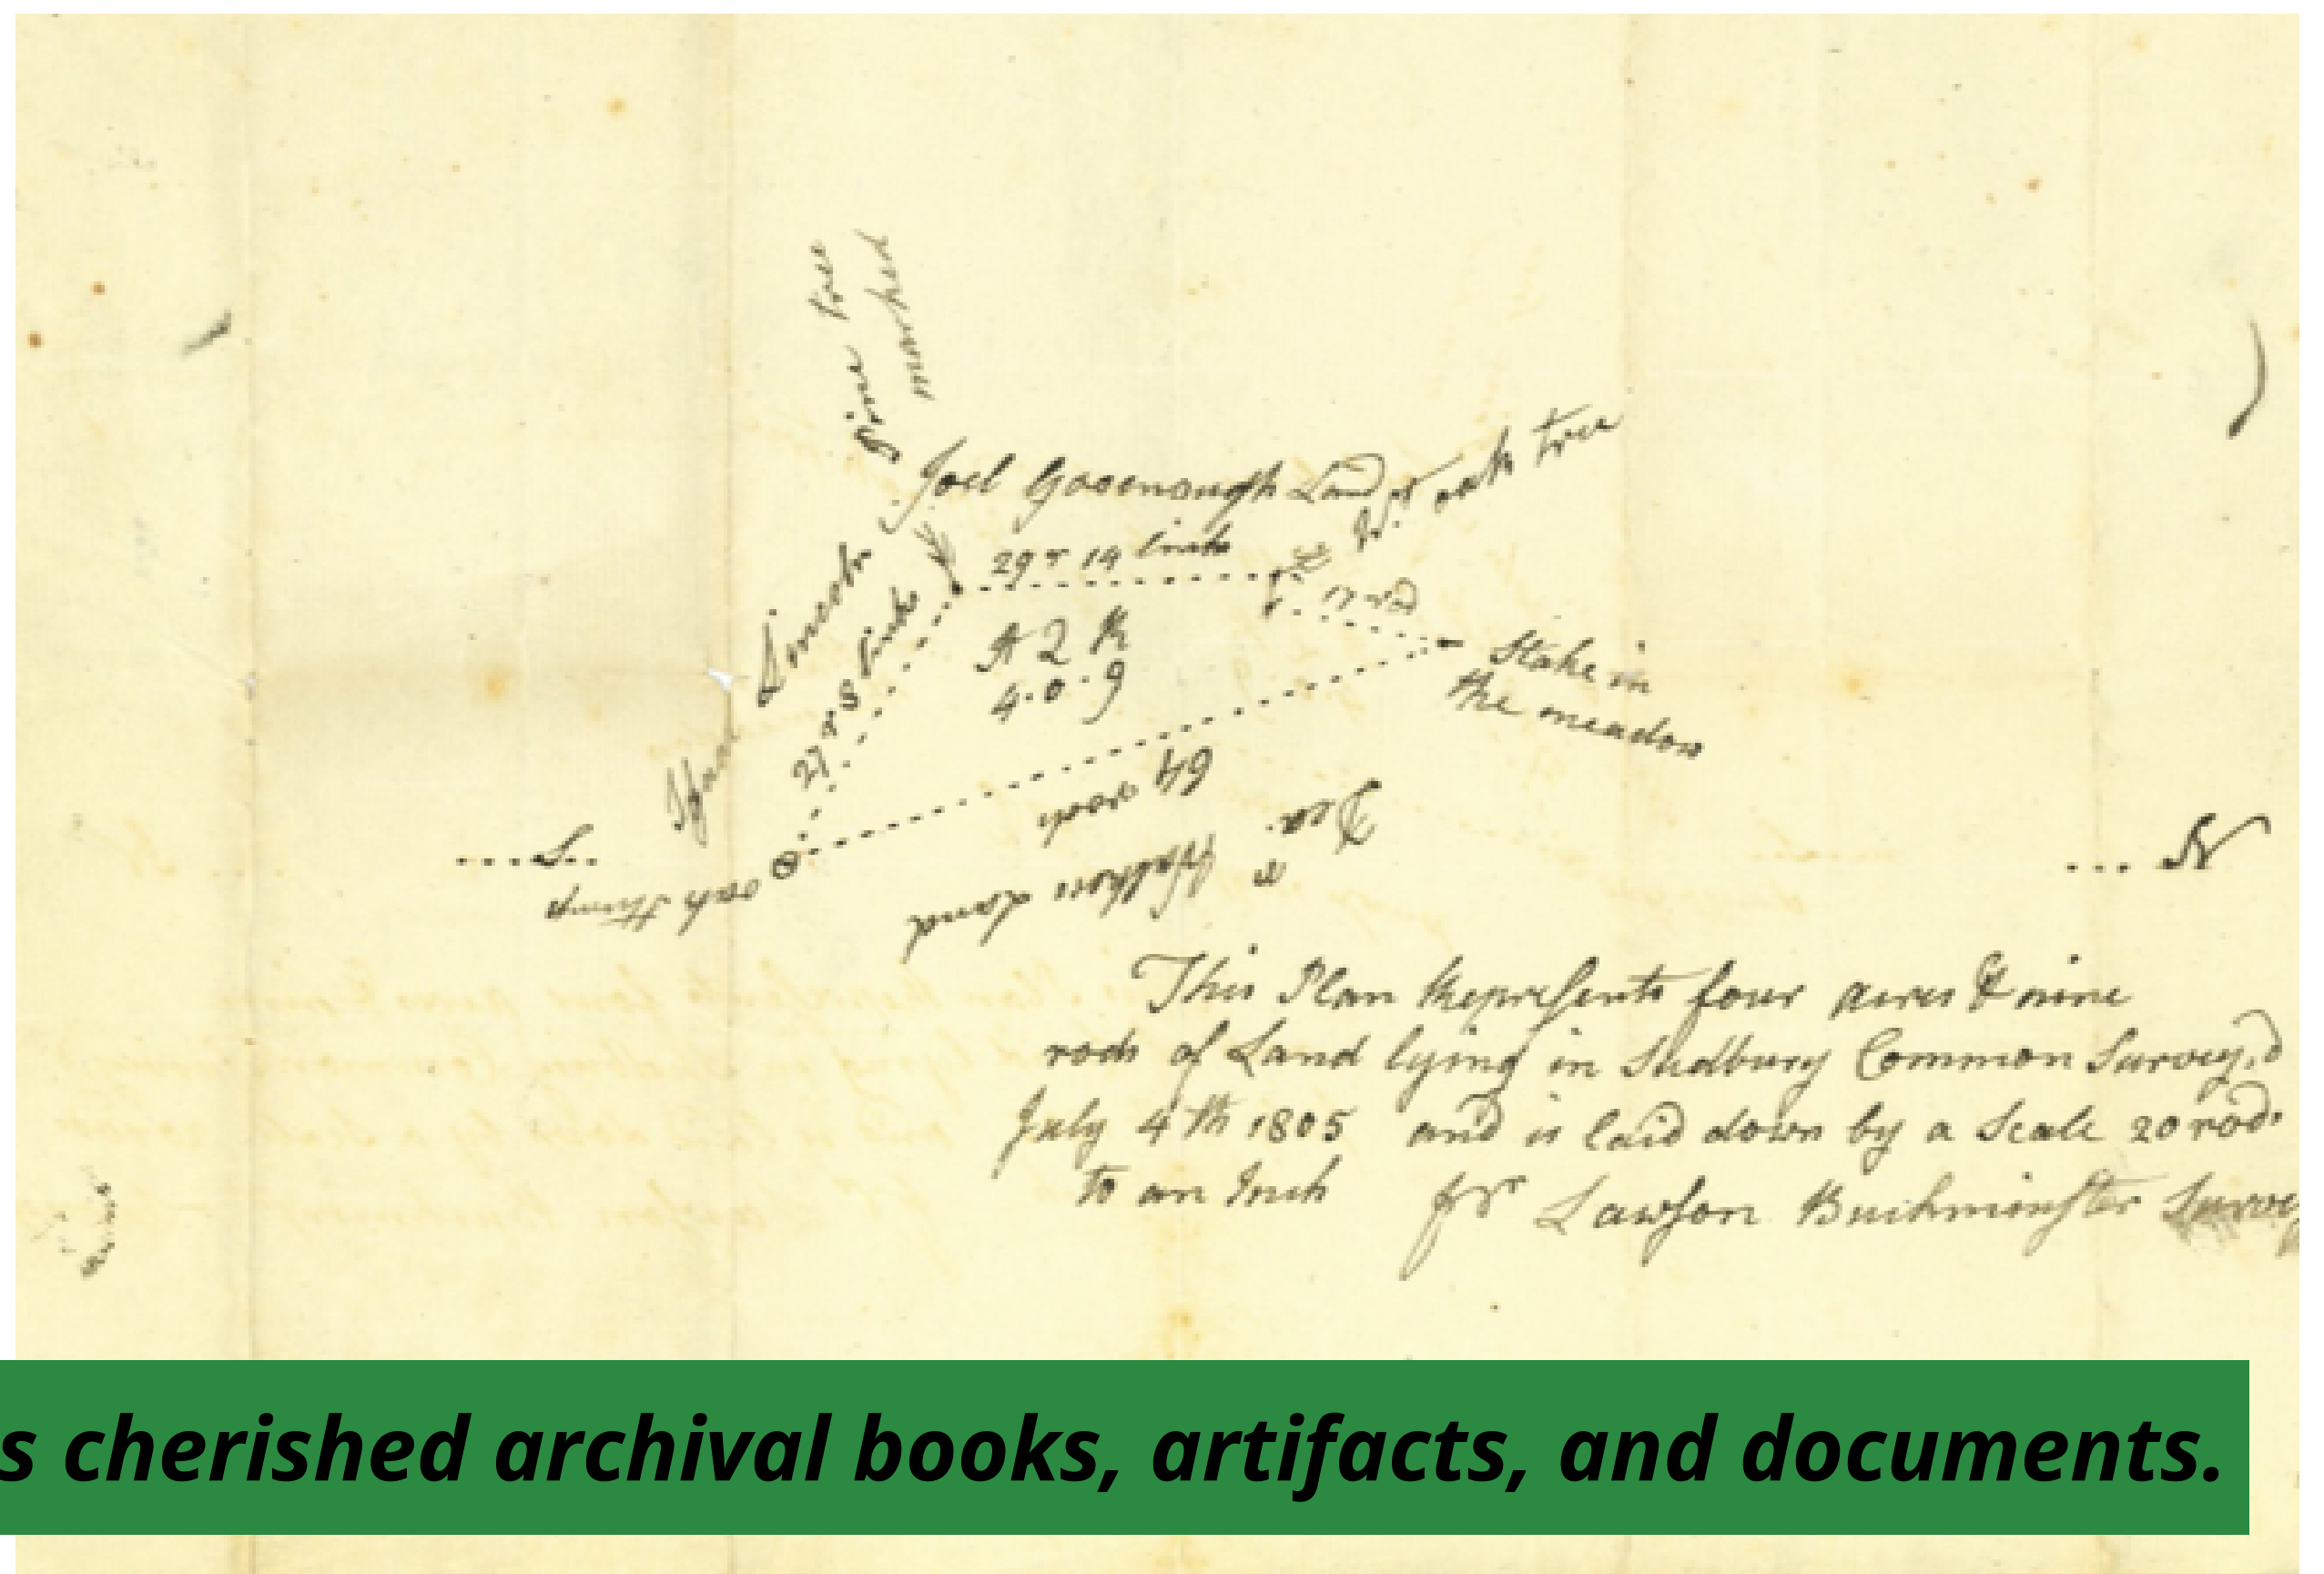

**Transforming this historic space for the 21st century.**

## Project Goals:

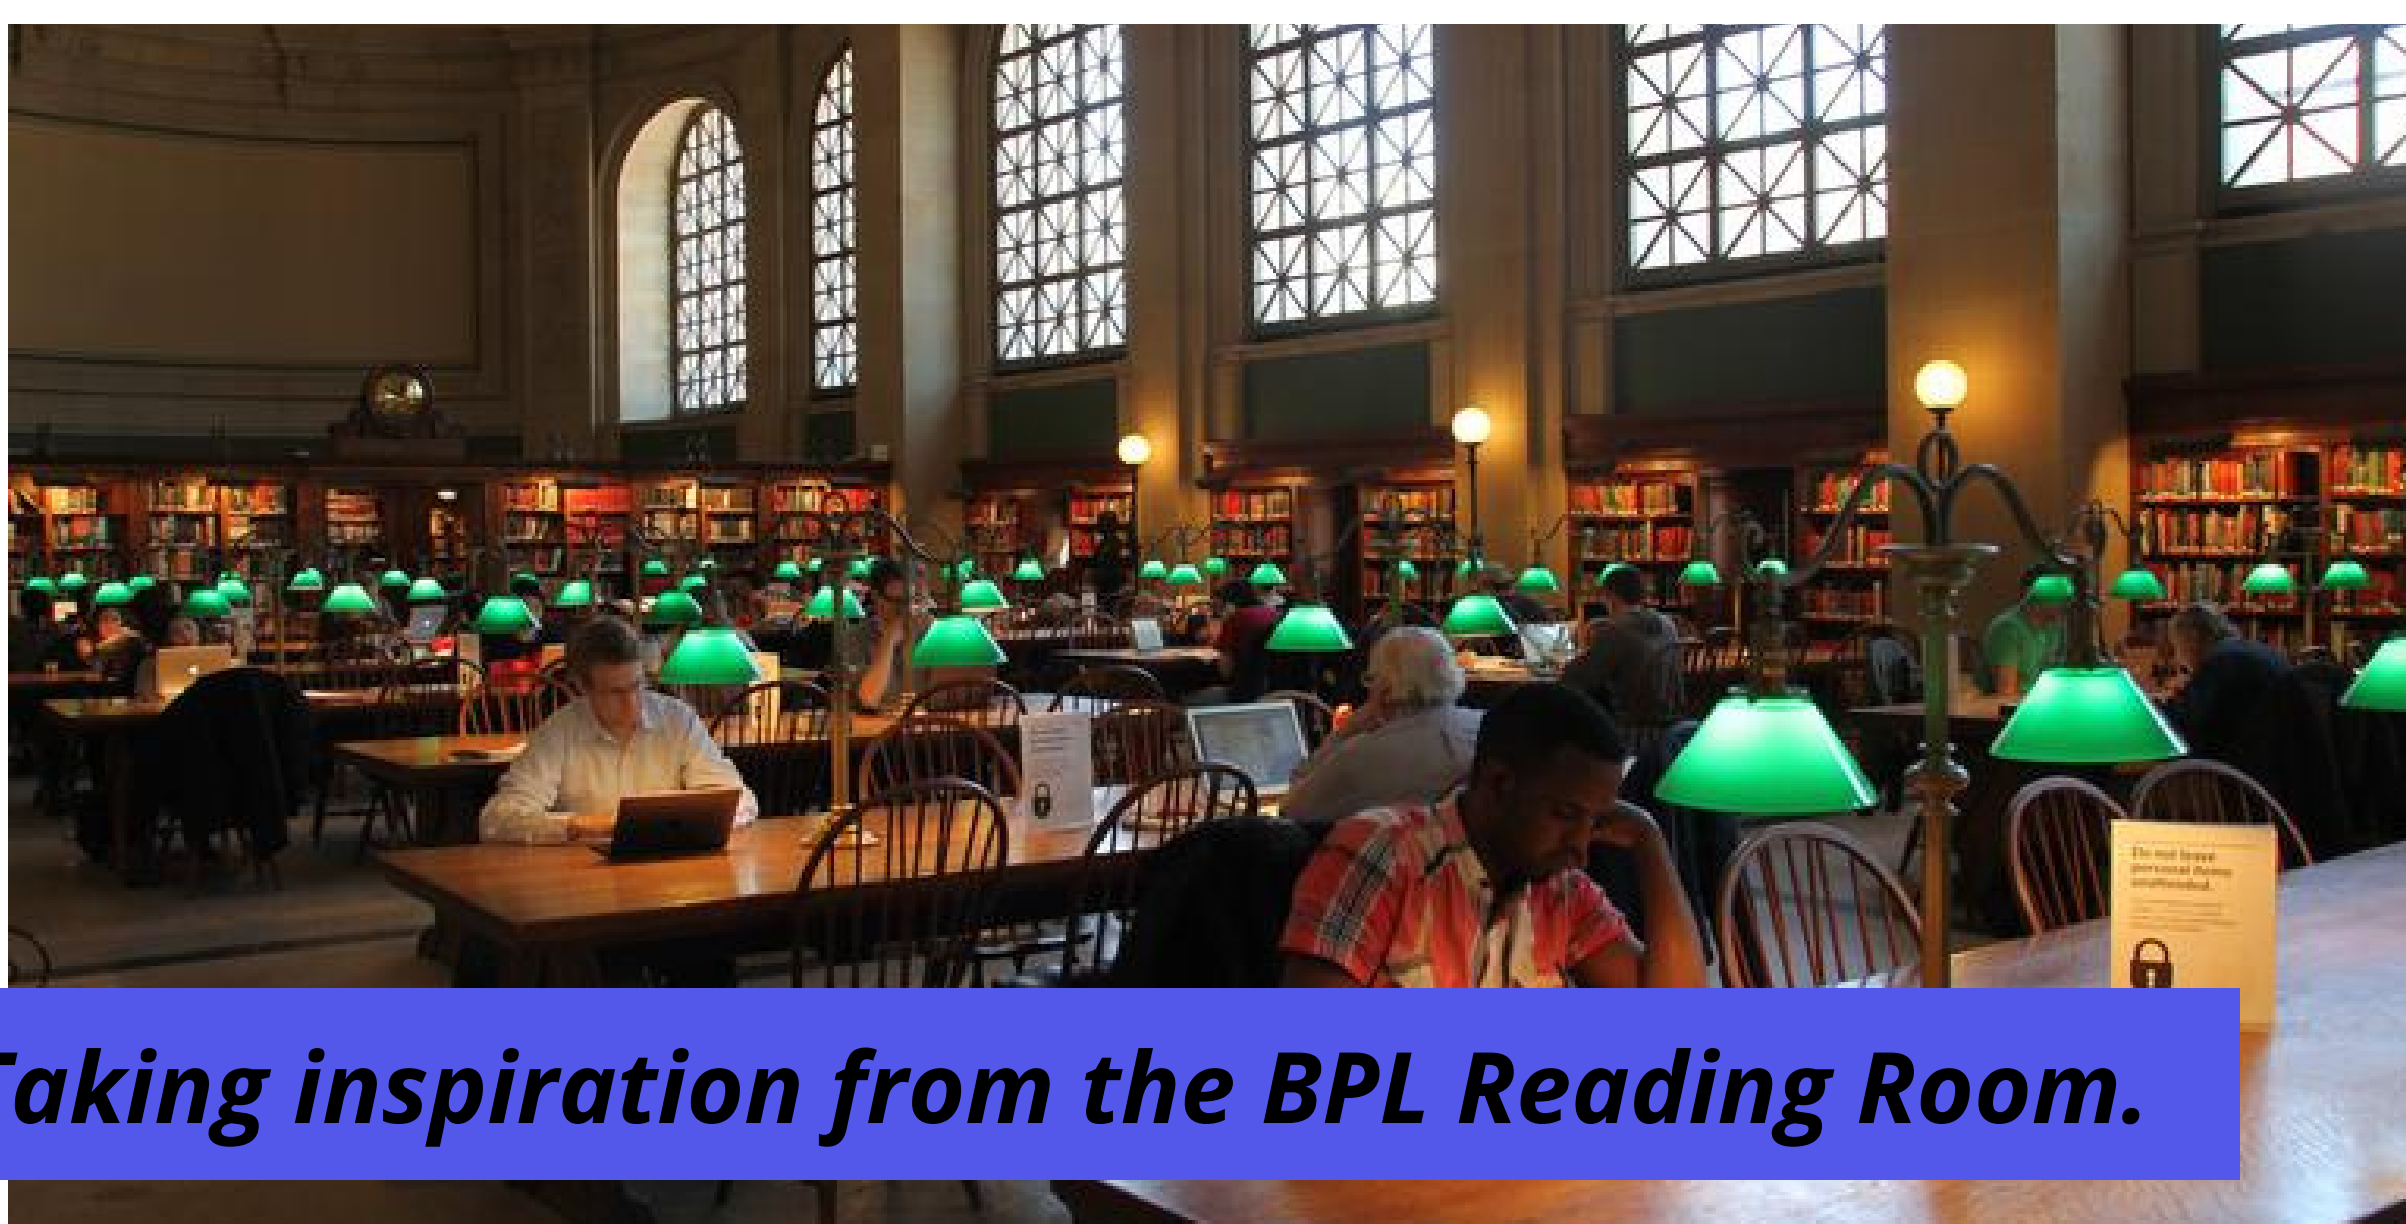

- Secure and customize storage for unique documents, maps, and artifacts;
- Rehabilitate existing shelving for the local history book collection and provide more display opportunities;
- Add four long study tables with task lights and outlets and additional arm chairs for reading;
- Install acoustic buffering to facilitate quiet space.

## Why Now?

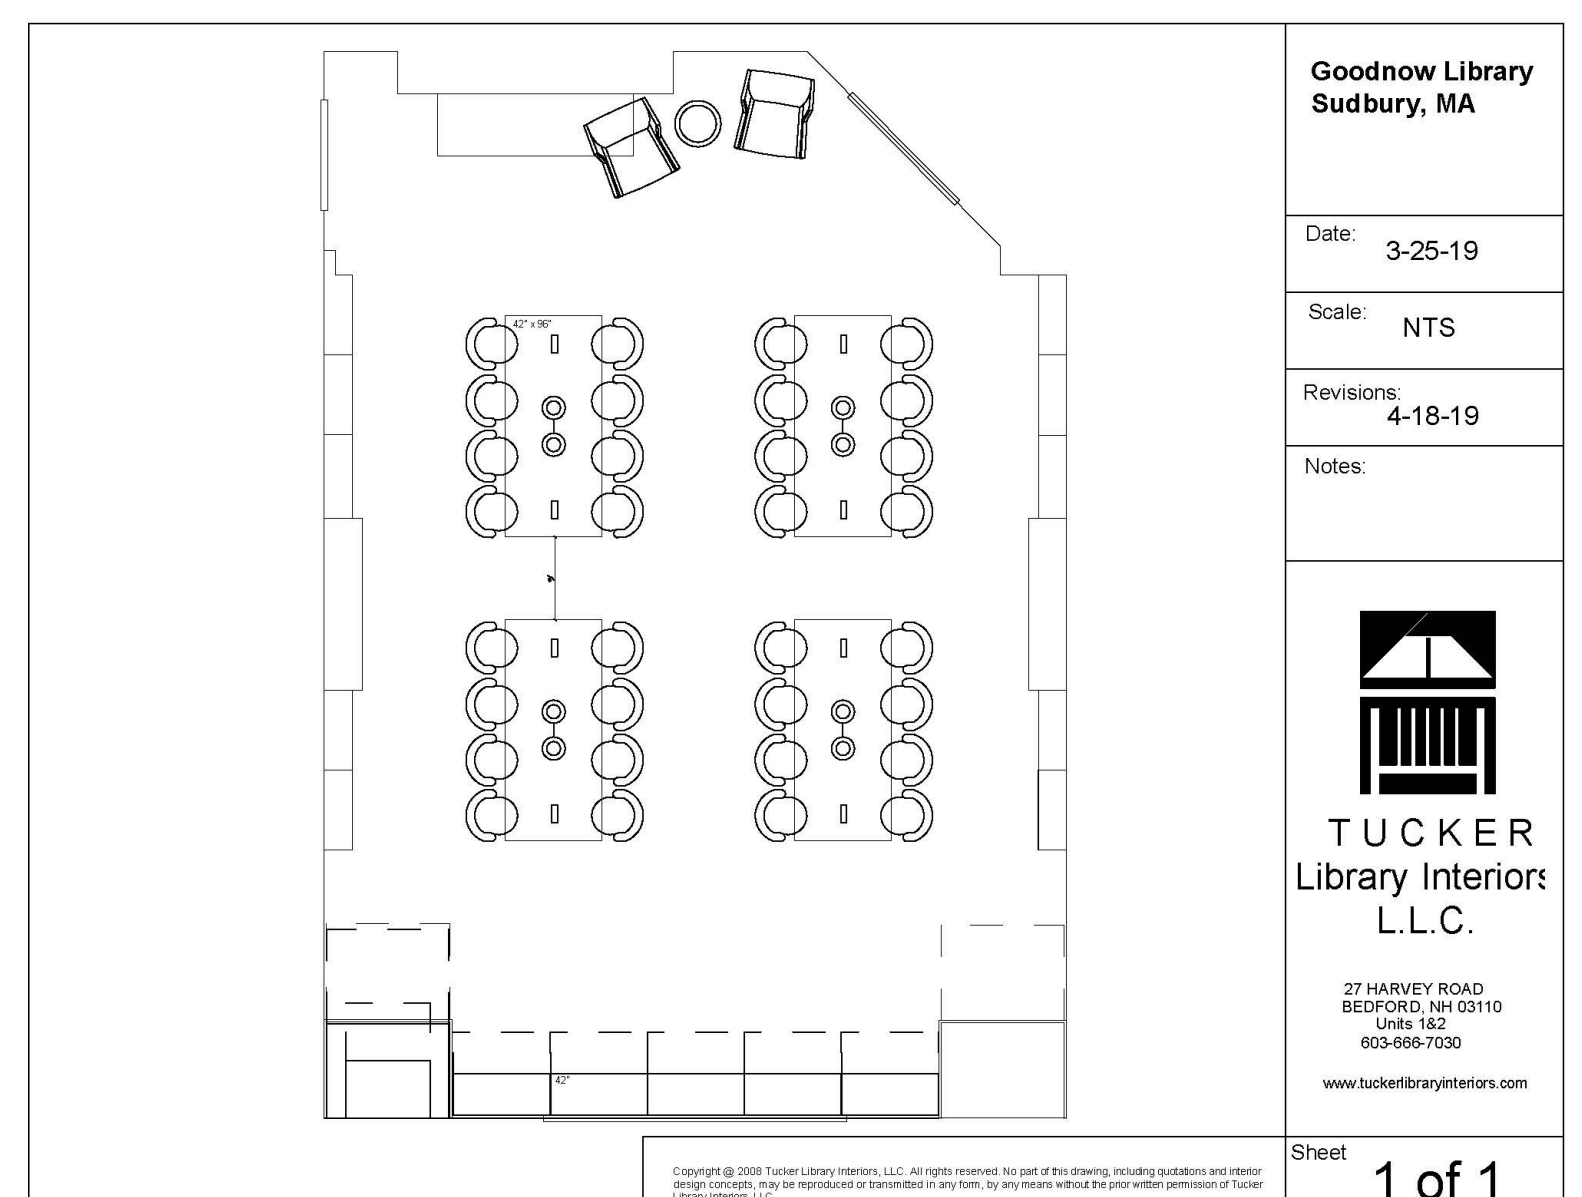

- The use of the Library has grown significantly as an increasing number of freelancers, remote employees, and students use Goodnow for work, study, and building connections in the community;
- As the Library has become more active, patrons and staff have expressed the need for a quiet space;
- Goodnow maintains an impressive collection of historical collections, documents, maps, and artifacts that must be protected.

**Protecting Goodnow's cherished archival books, artifacts, and documents.**

**Taking inspiration from the BPL Reading Room.**

**Please join us to reach our goal of raising \$50,000 to complete this transformational project.**
